

# Introducing the First CP/M Compatible Desktop Computer with Color Graphics.

The new Intecolor 8063 is the first desktop computer to combine the advantages of color alphanumerics and graphics with the versatility of CP/M. For unprecedented flexibility at a price within the reach of most small businesses, the Intecolor 8063 is the answer.

What does CP/M mean to you? An abundant selection of readily available software. There are CP/M programs for most business applications, minimizing the need for specially-prepared software.

Load the CP/M Operating System Disk and you're ready to run any CP/M program (without modifica-

tion), whether it's in BASIC, FORTRAN IV, or any other programming language. Add the superb readability and improved comprehension of color graphics and you've got unparalleled desktop performance.

Standard features of the Intecolor 8063 include a 19" color display with an 80 character x 48 line format, 32K of user RAM (expandable to 48K), and a dual 8" floppy disk drive with 591K bytes of storage (expandable to 1.1 megabytes).

Plus you get ISC's color version of Microsoft® Business BASIC on floppy disk. All for just \$5995.\* Incredible? Indeed, and only from ISC, the world's largest supplier of color CRT terminals.

If your application calls for it, Microsoft FORTRAN IV is available from ISC for \$150.00.\*

So if you want to spend more time computing than programming, contact your ISC sales representative today. Or check out the 8063 at selected computer dealers. CP/M in color. Only from ISC.

**Color Communicates Better**

\*U.S. Domestic prices. Unretouched photo of screen Furniture not included CP/M is a registered trademark of Digital Research Corp.
